

# New Marijuana

Marijuana has changed.

Marijuana wax, oil or concentrates can raise the THC content from the standard street level 15% to 65-85% THC.

Campus Safety Magazine, January 2015

Check local PBS and CBS/FOX listings for BROADCAST late August / September

“New Marijuana” is a documentary and series of short videos to help youth, parents and educators throughout New Mexico understand the various changes marijuana has undergone over the last several decades. The program includes information regarding **medical marijuana**, the **affect of cannabis on teenage brains** and **DUI and marijuana**. Because of recent debate and changes in the drugs usage and legality (medical and recreational), the **perception of marijuana** and its safety has changed dramatically. This project includes information about the most recent research and affect cannabis has on all of us.

Underwriters for the project include: The City of Albuquerque, Bernalillo County/Department of Substance Abuse Programs, State Farm Insurance, Cooperative Educational Services, NM Department of Transportation, NM Coalition of Educational Leaders, NM School Boards Association, NM Pediatric Society  
And SafeTeen New Mexico
